github workflows
Some input from a recent workshop at RLI

Jann Launer

RLI
oemof dev meeting 12/2019

Github workflow

- ▶ Issue title convention: The issue is that
- ▶ Open PR immediatly after creating new branch and link the issue. This allows others to notice that you are working on something.
- ▶ Commit often, do PR often, release often. This makes it easier to review changes.
- ▶ Branch protection: Allow merge only after at least one approval.
- ▶ python tool black

```
black -S
```

- ▶ .git/hooks/commit ist ein shell script. dort kann man linting checken.
